

Medallion Landscape Design Services

Landscape design and maintenance of your property is the most important component to an outdoor space. The design should enhance the overall look and image of your building but the design elements should also serve a functional purpose. When choosing Medallion, your landscape will be carefully planned to blend design and function and bring out the beauty of your property. Medallion Landscape can design/build or work with your plans coordinating with architects, developers and contractors.

SUSTAINABLE DESIGN AND WATER CONSERVATION

A sustainable landscape is one that creates an attractive environment with minimal use of resources. Landscapes designed to fit a particular site and climate can virtually take care of themselves using sustainable techniques that will not deplete or damage natural resources.

Hand in hand with a sustainable design, water conservation incorporates the opportunity to further reduce water usage through efficient irrigation design and installation. Medallion Landscape is an expert in water conservation and management and we work closely with the California Landscaper Contractors Association to provide sustainable landscape practices. The collaboration between our design and construction teams ensure that the integrity of the design will be maintained as it moves through each phase of implementation.

MEDALLION LANDSCAPE DESIGN SERVICES INCLUDE:

- Consulting and design
- Renovation and installation
- Environmentally-conscious strategies
- Colorscape design and installation
- Experienced on-site supervisors

**MAINTENANCE
TREE CARE
RENOVATIONS
WATER CONSERVATION**
