

Medallion Landscape Adding Annual Color

One of the major benefits of using Medallion Landscape is access to our in-house landscape design team and horticulture specialists. Our team has a vast amount of experience in landscape enhancements to increase the curb appeal and value of your most visible asset. Our team partners with you to determine what it takes to make your landscape vision a reality. We will endeavor to accomplish this while working within your budget and time frame constraints.

When looking to add annual color, our specialists can help guide you to the best solution to highlight focal areas of your property. The impact of adding annual color to your landscape can't be understated. Brightening up your landscape especially near front entrances is a great way to highlight certain areas, and draw the eye to the entrance.

Adding colorful potted plants is a great way to brighten up your landscape. These can easily be updated year round and can even bring a pop of color to a shady area. Flower pots also give you the flexibility to move them around and change out the plants to keep them colorful throughout the seasons.

At Medallion we also look beyond just flowers to add color. Dramatic interest can be gained by also using plants and foliage with colorful leaves.

MAINTENANCE
TREE CARE
RENOVATIONS
WATER CONSERVATION
